To Our Valued Atlas Tube Customers:

The U.S. government recently announced that they will impose tariffs of 25% on steel products imported from Canada, Mexico and the EU. The tariffs impact shipments that enter the U.S. on June 1 or later.

We want to assure you that Atlas Tube is prepared for this development. Atlas Tube will pay the import tariff for products shipped to you from our Canadian facilities. We anticipate no interruption in supply and have sufficient capacity to supply your structural tubing needs.

If you have any questions regarding market conditions or the tariffs, please feel free to contact your Atlas Tube Representative or me. Thank you for your business and support.

Sincerely,

A handwritten signature in cursive script that reads "Tom Muth".
